Trento, 19 April 2022 – The Board of Directors of Dolomiti Energia Spa today approved the financial results for the year ended 31 December 2021.

In what was, as is well known, a year characterised by an entirely unpredictable trend in energy raw material prices, involving unprecedented increases in market history, the Company recorded results that were heavily affected by the impact of these exceptional and anomalous events. In this extremely volatile and critical context, it is important to highlight the positive performance of commercial activities that even in an extremely difficult situation, once again this year recorded positive results with an increase in the number of customers served, bringing their number to over 726,000, with a net increase of around 29,000 supply locations. It must also be remarked that despite the dramatic price increase of commodities on the European energy markets, thanks to the sales policy decisions to maintain the already existing offers, the gas and electricity customers on the free market were able to save about 25% on the unit price (per kWh/Smc) of the raw material on the bill, with reference to the 2021 average of wholesale prices (PUN/TTF), equivalent to about 130 million euro on an annual basis.

Financial statements as at 31 December 2021: main economic and financial data (millions of euro)

	2021	2020
Total revenue and other income	1104.8	835.5
Gross operating margin (EBITDA)	-1.5	42.2
